

# Mix & Match Quilting

by Anita Goodesign

We have been getting requests for dogs and cats for years so we are proud to present our Dogs and Cats Mix and Match quilt collection. There are 10 different dogs and 10 cats in this collection that included beautiful quilted backgrounds and stippling. There are also 5 different transitional blocks to use in your quilts. Best of all this is like 2 collections in one! Each of the dogs and cats come by themselves without the backgrounds.

The best part about this collection is that you can combine it with other Anita Goodesign collections! This collection is part of the "Mix and Match" quilt line. All of the design collections that are in the "Mix and Match" line come with 5", 6", 7" and 8" blocks and are fully interchangeable. There are redwork collections, folded fabric collections, special editions, jelly roll collections plus many others. Visit our website [www.anitagoodesignonline.com](http://www.anitagoodesignonline.com) for additional information and videos.  
Steve Wilson

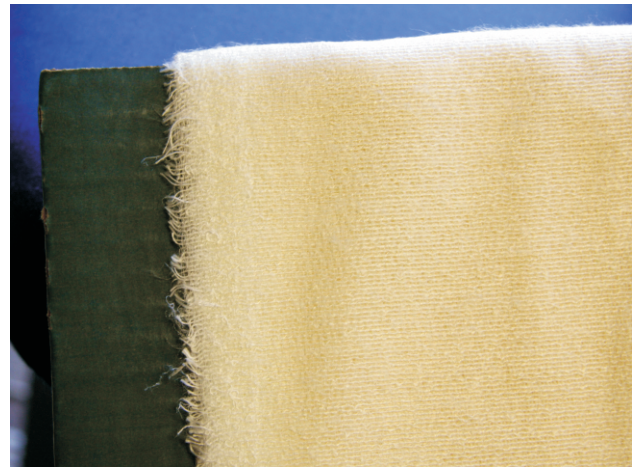

## Working with Fabric and Stabilizer

As an embroiderer you know that not all fabrics are the same. How do you know that your fabric will work with this project? Obviously, the more durable the fabric the better your results will be. **You will see that we used cotton for this project.** Even cotton comes in different weights. What we do at Anita Goodesign to insure great results is back our fabric with fusible interfacing. If you have never used fusible interfacing with your embroidery projects you should start. Fusible interfacing will eliminate puckering and distortion in your embroidery designs. Many of you have used fusible interfacing to strengthen your fabrics when sewing, so what is the difference when your embroidering a design? Absolutely nothing! We use a medium weight iron on fusible such as armo-weft, ultra-weft or whisper-weft. You want to avoid any of the thick craft interfacing because they will make the fabric too thick. To use the interfacing simply iron it on to the entire piece of fabric that you are embroidering. You will notice an improvement right away.

Now you may be asking what about stabilizer? Even though you used interfacing on your fabric you still need to use some type of stabilizer. Interfacing will strengthen your fabric, your stabilizer is needed to support your embroidery threads. If you interface your fabric properly you will only need to use a single piece of medium weight tearaway.

There is one more tip we can give you to insure optimum embroidery results: proper hooping. Since you are only hooping a piece of tearaway stabilizer with a piece of muslin we recommend hooping and not stick back stabilizer or magnetic hoops. These designs are very stitch intensive and need to be hooped. When you hoop your fabric make sure it is tight in the hoop. We also suggest doing a test with your brand of stabilizer, if you get puckering with tearaway try using a cutaway instead.

If you visit our facebook site you will see numerous videos on embroidery techniques like using interfacing and stabilizer. Simply visit our website at [www.anita-goodesign.com](http://www.anita-goodesign.com) and follow the link for facebook.

This is a photo of the interfacing we use.

Fuse the stabilizer to your whole piece of fabric.

This is a close up shot of the interfaced fabric.

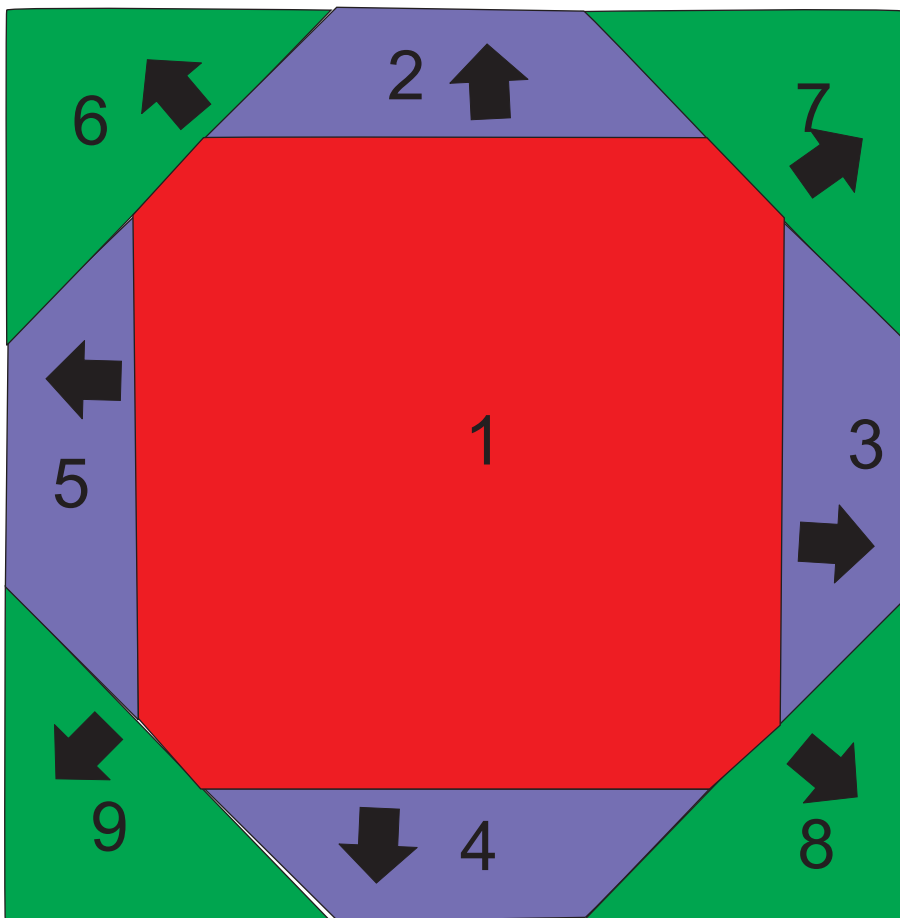

For best results us the same technique on your cotton base fabric.

# Dogs and Cats

At Anita Goodesign we love to buy fabric, for this collection we purchased a collection of beautiful batik fabrics in shades of pink. The key to a successful project is the interaction between the fabric and thread. Once we find the fabric we like we then choose complimentary thread colors to go with that fabric, not the other way around. You can use any type of fabric with this collection but we loved the choices the fat quarter bundles gave us. Each of the designs in this collection come in 4 different sizes. The reason I did this was so that this collection would be compatible with our other quilt collections. You can interchange this collection with the Christmas Special Edition as well as Quilters Dream, Quilters Dream 2, Jelly Roll Quilt Blocks and Folded Fabric Quilt Blocks. The following pages will show you many different projects that you can do with these designs. Make sure you also allow for seam allowances when measuring fabric.

Steve Wilson

## How the blocks work

Some of the blocks in this collection use our folded fabric technique. There is a complete tutorial on the following pages. Each design page will show you a scan of the block as well as a folding diagram and an example of how that block can be used. The photo to the left demonstrates the folding diagram. The number 1 indicates the first fabric placed down. The number 2 and above indicate the folded fabric sections. The arrows indicate the direction the fabric will be folded.

# Dogs and Cats

## Notes on Sizes

Each of the block designs come in four sizes . The sample we embroidered used the large size. Each of the 4 sizes look wonderful. Of course, the larger sizes take longer to embroider. We created all of our samples using the “A” size.

Designs with the letter “**A**” at the end are the large designs for a hoop that can embroider at least 7.8” x 7.8”

Designs with the letter “**B**” at the end are the medium sized designs. You will need a hoop capable of embroidering 6.8” x 6.8”

Designs with the letter “**C**” at the end are the small designs for a hoop that can embroider at least 5.8” x 5.8”

Designs with the letter “**D**” at the end are the smallest designs for a hoop that can embroider at least 4.8” x 4.8”

# Dogs and Cats

For this quilt we used a mixture of Dogs and Cats as well as the rectangular striped block and the small squares. The transitional blocks create great borders between the larger blocks.

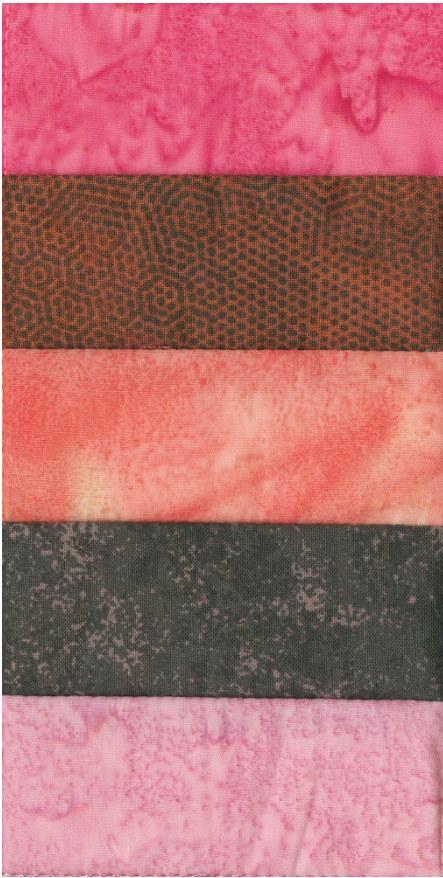

# Dogs and Cats

For this quilt we used the large transitional blocks for a checkerboard quilt.

# Dogs and Cats

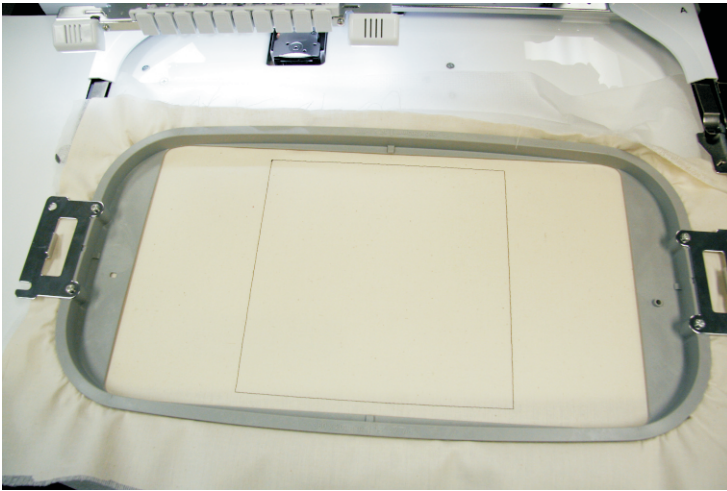

There is one rectangular, 2 small squares and 2 large squares that you can use as transitional blocks. Some of these blocks use our folded fabric technique. The folded fabric tutorial is located at the end of this book. You can also use any of the blocks from the Foundations Special Edition to further enhance this quilt. Foundations contains more blocks and borders.

The first step is to hoop a piece of muslin with your stabilizer on the bottom. We use Floriani No Show Mesh. No Show Mesh is a cutaway stabilizer but it is very soft. We actually sew the stabilizer into the quilt instead of trying to remove it so this stabilizer works the best. If you don't have Floriani stabilizer, you can easily substitute it with a similar product.

**Note: You will see that we used black thread in the tutorial. This is for educational purposes only. We recommend match your thread to the fabric for everything except the center design**

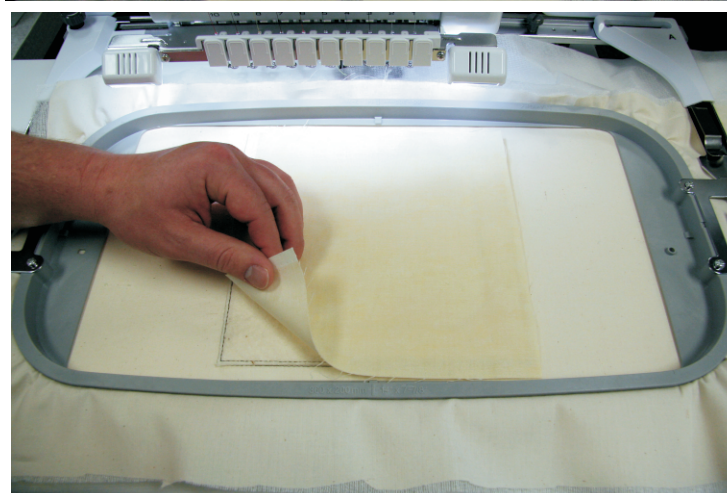

Stitch step one of the design, this is the squaring stitch. This shows you the shape of the block. Everything that stitches inside this block will be seen in the quilt, everything outside the square will be sewn into the seam allowance.

Some of the Mix and Match quilts have the option of adding batting to each block. If you choose to add batting you would place it after step one. Simply cut a piece of batting so that it is the same size as the square. The advantages to adding batting now is that if there is stippling or quilt stitches in the design they will be more dimensional. The disadvantage is that you will have to pre-cut lots of squares of batting. **If you don't want to add batting in each block, simply skip this step .**

Stitch the next step of the design. This is a tacking stitch for the batting. It is slightly inside the square so that it catches the batting. If you aren't adding batting to each block individually, then you can skip this embroidery step.

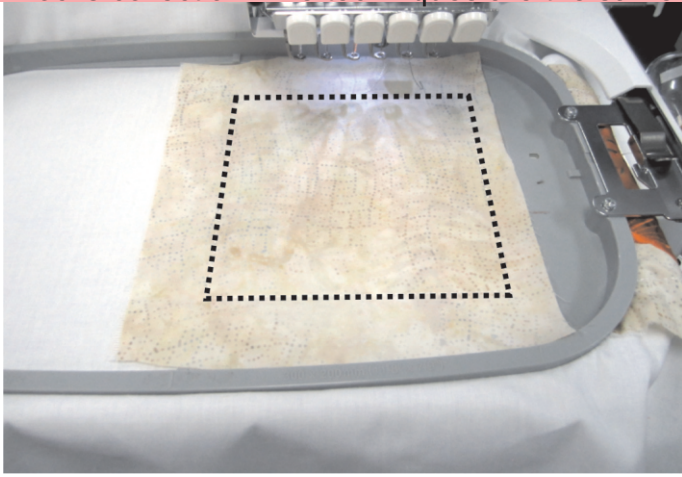

This block has a center panel with folded fabric around it. The first piece of fabric we will place is the center fabric. Stitch step three in the design, this is the placement stitch for the first piece of fabric.

Next place your first piece of fabric down so that it completely covers the placement stitch.

This tutorial originally appeared in the "Blanket Stitch Christmas Blocks collection. The techniques are the same in this collection.

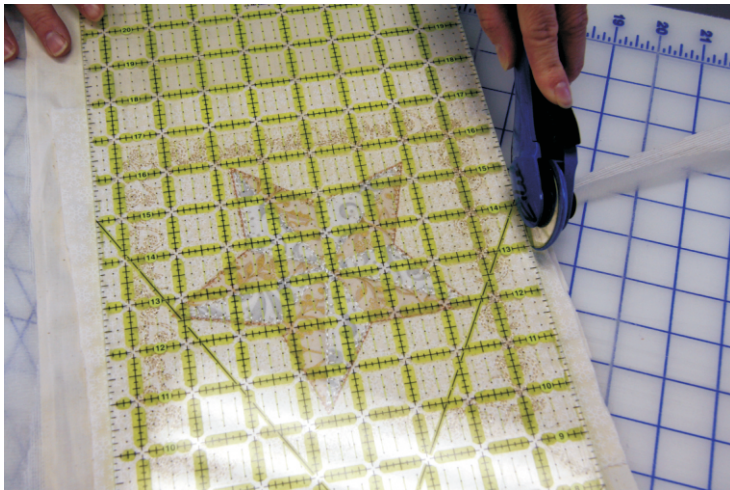

# Dogs and Cats

Stitch step two of the design. This tacks both you batting and fabric down. You will notice now how your fabric is already quilted.

Each block uses applique. Each applique has three steps. The first step is a placement stitch that shows you where to place your fabric. The second stitched the fabric in place. After the fabric is stitched in place trim it as close as you can. The third step is the finishing stitch. The finishing stitch may not be right after the other two stitches.

Finish stitching the design. When the block is finished use your rotary cutter and ruler to cut your seam allowance.

This is what your trimmed block will look like.

This tutorial originally appeared in the “Blanket Stitch Christmas Blocks collection. The techniques are the same in this collection.

## Dogs and Cats

Stitch the designs into strips. To stitch them together lay two of the blocks face down so that the squaring stitches are lined up. Use a straight stitch on your machine, match your thread to the squaring stitch color. The squaring stitches should be hidden in the seam when your finished.

Now all you need to do is stitch the strips together to complete the project. Now you would quilt as normal by adding your batting layer, stitching in the ditch and binding it.

# Dogs and Cats

We devised a way to cut down on fabric usage. Instead of cutting a large piece of fabric as your base to hoop you are going to hoop a piece of inexpensive muslin or cotton. You will then use your base fabric as an applique. It is a very simple technique and it eliminates fabric wastage. You will also not need to center your designs before cutting your blocks, this is all done in the design itself. Your projects will be done in half the time!

To start hoop a piece of muslin along with the No Show Mesh Stabilizer.

Stitch out step one, this is the squaring stitch. The squaring stitch will designate the size of the finished block.

Stitch the next step in the design. This is the placement stitch for your first piece of fabric.

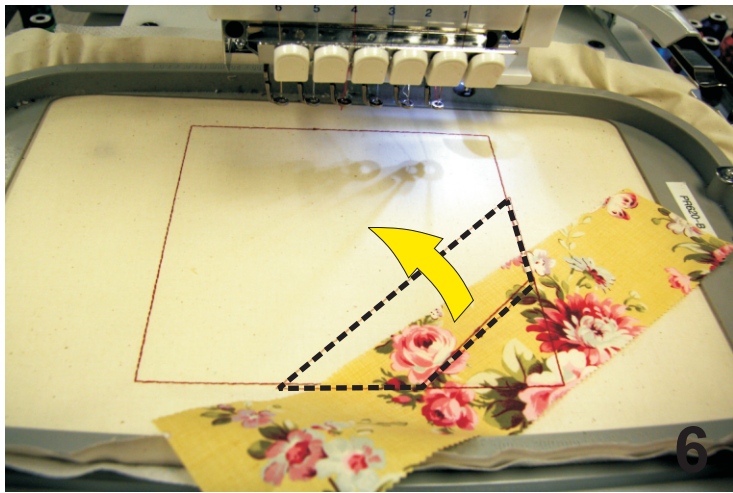

Lay your first piece of fabric down (decorative side up) so that it completely covers the placement stitch.

You will use this tutorial for the folded fabric blocks

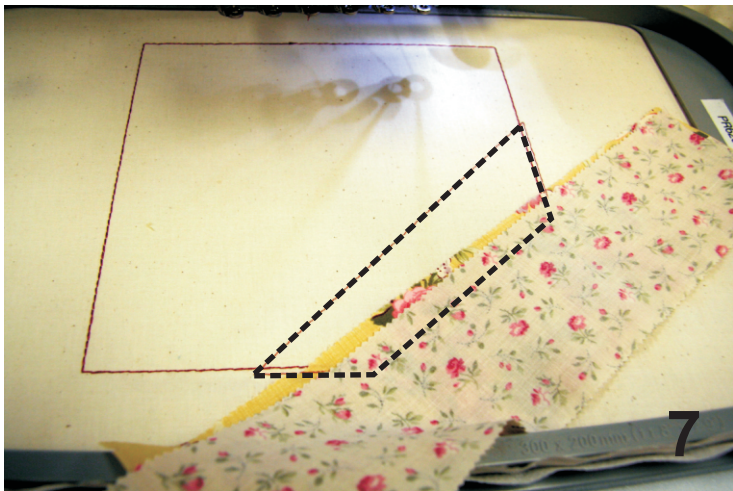

# Dogs and Cats

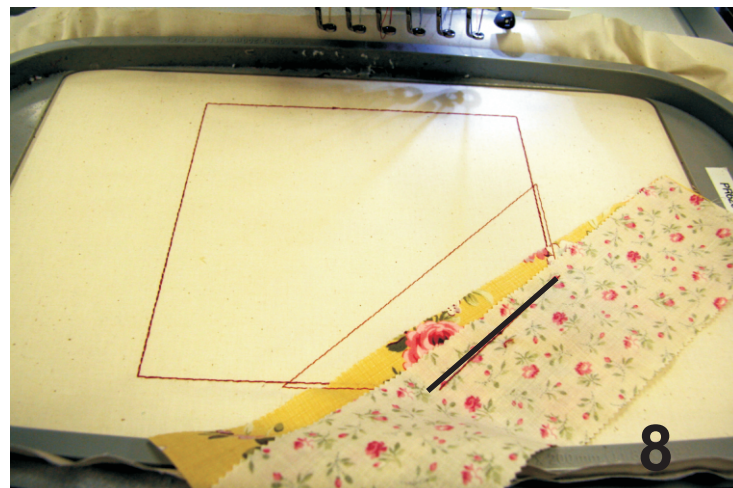

Stitch the next step in the design. This will tack your first piece of fabric in place. The remainder of the appliques use the folded fabric technique which consists of three steps. Make sure you always leave at least  $\frac{1}{2}$ " of fabric extending outside the squaring stitch. Don't forget this is your seam allowance. Always match your thread to the color of the fabric.

Stitch the next step in the design. This is the placement stitch, it will show you the exact shape of the applique.

Lay your next applique fabric face down so that  $\frac{1}{2}$ " of it extends past the top of the placement stitch. The dotted line indicates where the placement stitch is. You can use tape or spray adhesive to hold it in place if you need to.

Stitch the next step of the design. This is the folding line. It will stitch across the fabric.

# Dogs and Cats

Fold your fabric over so that it is now face up. The folding line that just stitched will allow you to achieve a perfect fold. Again you can tape it in place if you think its necessary.

Stitch the next step in the design. This will tack the folded fabric in place. The dotted line to the left indicates how this stitch will look. Always match your thread to the color of the fabric.

You will now repeat these steps for the next 5 strips there are 6 total jelly roll strips used in this design. When you are finished you have a quilt block that looks like you pieced it in the traditional manner.

Using your ruler and rotary cutter trim the blocks leaving a  $\frac{1}{2}$ " seam allowance around the outside.
